What is a D-U-N-S Number?

The D-U-N-S Number is a unique nine-digit identifier for businesses. It is used to establish a D&B® business credit file, which is often referenced by lenders and potential business partners to help predict the reliability and/or financial stability of the company in question. "D-U-N-S," which stands for data universal numbering system, is used to maintain up-to-date and timely information on more than 285 million global businesses.

How much does it cost?

About the D-U-N-S Number

Established in 1962, Dun & Bradstreet's Data Universal Numbering System, commonly known as the D-U-N-S® Number, is a unique global business identification system that identifies, validates, and links to more than 280 million businesses worldwide.

The D-U-N-S Number is a nine-digit non-indicative numbering sequence and is assigned at the lowest organizational level, i.e. business locations with a unique, separate, and distinct operation. The D-U-N-S Number is assigned to all types of business organizations including sole proprietorships, corporations, partnerships, non-profits, and government entities. The D-U-N-S Number is constant— it stays with a business throughout the lifecycle including name, address and corporate structure changes and even bankruptcy.

The D-U-N-S Number is not just a number—it is a system for maintaining accurate, comprehensive and timely information – and it is issued rapidly and **free of charge** for all entities wanting to do business with the U.S. Federal Government.
