FOLLOW UP AND FOLLOW THROUGH

BONUS DAY

WHAT IS A PARTNER?

Partner - A partner in a business refers to entities or individuals that collaborate closely with a company to achieve common goals or undertake specific projects, often through strategic alliances or joint ventures.

Business partnerships stand as a cornerstone of growth, innovation, and sustainability in the corporate world. They encompass a wide range of forms, including strategic alliances, joint ventures, and supplier relationships, each tailored to leverage mutual strengths for shared success.

"The greater your Partnerships the farther you go."

7 WAYS TO LEARN

1. Active - Engage with the material problem solving
2. Visual - Seeing charts and graphs to connect the dots
3. Auditory - Lectures, audiobooks, podcasts
4. Reading and Writing - reading textbooks, articles
5. Hands on - physical activities: models, experiments
6. Collaborative - group discussions, study groups
7. Mentorship and apprenticeship - learning from someone experienced in the field

CONDUCT BUSINESS ASSESSMENT

Conducting a business assessment involves a comprehensive review of a company's overall health and performance. This process typically examines various aspects of the business, including financial stability, operational efficiency, market position, and compliance with legal and regulatory requirements. The objective is to identify both strengths and areas for improvement, enabling the formulation of strategies to enhance competitiveness, optimize operations, and ensure sustainable growth. Business assessments are crucial for informing strategic decisions, supporting investment considerations, and identifying potential risks and opportunities within the marketplace.

SWOT ANALYSIS

A SWOT analysis is a strategic planning tool used to identify and understand the Strengths, Weaknesses, Opportunities, and Threats related to a business or project. It involves an objective look at what an organization does well (strengths), where it can improve (weaknesses), external conditions that could be beneficial (opportunities), and external challenges it may face (threats). This framework helps organizations in making decisions and strategies that capitalize on their advantages and protect against their vulnerabilities. SWOT is commonly used across many industries for business expansions, improving operations, identifying competitive advantages, and strategic planning.
