Day 2 - Creating your Avatar: The Partner Journey

3

Day 3 - Partner Data Gathering to Build Rapport

4

Day 4 - Partner Offer Scripts and Demonstrating Expertise

5

Day 5 - Create Partner Success and Win Long Term

PARTNER DEFINITION FOR GOVERNMENT CONTRACTING

DAY 1

WHAT IS A PARTNER?

Partner - A partner in a business refers to entities or individuals that collaborate closely with a company to achieve common goals or undertake specific projects, often through strategic alliances or joint ventures.

Business partnerships stand as a cornerstone of growth, innovation, and sustainability in the corporate world. They encompass a wide range of forms, including strategic alliances, joint ventures, and supplier relationships, each tailored to leverage mutual strengths for shared success.

"The greater your Partnerships the farther you go."

7 WAYS TO LEARN

1. Active - Engage with the material problem solving
2. Visual - Seeing charts and graphs to connect the dots
3. Auditory - Lectures, audiobooks, podcasts
4. Reading and Writing - reading textbooks, articles
5. Hands on - physical activities: models, experiments
6. Collaborative - group discussions, study groups
7. Mentorship and apprenticeship - learning from someone experienced in the field

WHAT IS MIMICRY?

Mimicry in business refers to the strategy or practice where a company copies or imitates the products, services, processes, strategies, or business models of competitors or industry leaders.

This approach is often used by companies seeking to enter a market by capitalizing on the proven success of existing players, quickly adapting to industry trends and standards. Mimicry can occur in various aspects of business, including but not limited to product design, marketing strategies, operational methods, and corporate culture.

The idea is if you can model the success habits of the people on this challenge you can get their results.

WHAT IS APPRENTICESHIP?

An apprenticeship is a structured training program that combines on-the-job training with classroom learning. It's designed to teach individuals the practical and theoretical aspects of a specific trade or profession.

Apprentices are typically paired with experienced workers or mentors who guide their learning and skill development in a real-world environment. At the same time, apprentices may also complete formal education components at a vocational school or institution. This blend of hands-on experience and academic learning enables apprentices to gain the necessary skills, knowledge, and competencies to become proficient in their chosen field.

4 TYPES OF PARTNERSHIPS

1. Teaming - Work together to bid on project
2. Consultant - Work for someone (independent) to bid on a project
3. Subcontractor - GIve you their price and you bid the project
4. Supplier - Give you their price for the product and you bid

WHAT IS TEAMING?

A small business teaming agreement is one that allows a contractor to maintain its status as a small business, while allowing it to bring in another small business – or a larger business – to contribute some of the work on the project.

Small Business Teaming Agreement

- Advantages

- Disadvantages

WHAT IS A CONSULTANT?

A consultant is a professional who provides expert advice in a particular area. Consultants offer their expertise to businesses, organizations, or individuals, helping them solve specific problems, improve performance, implement changes, or achieve their goals more efficiently and effectively.

The primary value of a consultant lies in their ability to bring expertise, an outside perspective, and a focused approach to tackling specific issues, which enables clients to save time and resources while achieving optimal results.

- Advantages

- Disadvantages

WHAT IS A SUBCONTRACTOR?

A subcontractor is a type of contractor who is hired by a general contractor (or sometimes a prime contractor) to perform a specific task as part of the overall project and is typically specialized in a particular domain or trade. Subcontractors are commonly used in industries such as construction, where a large project might involve many different types of specialized skills, including plumbing, electrical work, roofing, and painting, among others.

- Advantages

- Disadvantages

WHAT IS A SUPPLIER?

A supplier is a person, organization, or entity that provides goods or services to another individual or organization, known as the customer or buyer. In a business context, suppliers are crucial for the supply chain, as they offer the raw materials, finished products, or services that companies need to operate and deliver their own products or services to the market. Suppliers can range from manufacturers and wholesalers to independent craftspeople and service providers. The relationship between a business and its suppliers is fundamental to its ability to maintain steady production, ensure the quality of its offerings, and achieve profitability. Effective supplier management involves negotiating terms that benefit both parties, ensuring timely deliveries, and maintaining quality standards.
