c. CORRECTION OF NOTED				✘		

20. REMARKS *(Explanation of unsatisfactory evaluation is required. Other comments are optional. Provide facts concerning specific events or actions to justify the evaluation. These data must be in sufficient detail to assist contracting officers in determining the contractor's responsibility. Continue on separate sheet(s), if needed.)*

The scope of work involved the reproduction of historical windows that were very intricate. Tavares managed two separate manufacturers throughout the process. There were a couple issues during the initial testing and those items were investigated, diagnosed and corrected in a timely fashion. Overall it was a great experience working with Tavares on what was ultimately a very complex project for the Core & Shell work.
